Carlos Ordonez

(807) 357-3549 | Toronto, ON, Canada | carlosord1609@gmail.com | LinkedIn | GitHub | Portfolio

SKILLS

Frontend: React, React Native, Next.js, Flutter, TypeScript, Javascript
Backend & Cloud: Node.js, Express, NestJS, Firebase, AWS (Cognito, Amplify), Azure OpenAI, NoSQL (Firestore), SQL (PostgreSQL, MySQL), Git, CI/CD
Machine Learning: Python, PyTorch, TensorFlow, scikit-learn
Certification: AWS Certified AI Practitioner

EXPERIENCE

Full Stack Software Developer *Jan 2026 – Present*
Himigo *Toronto, ON*

- Modernized a **NestJS** job pipeline by aggregating Tavily, SerpAPI, and Canadian Job Bank listings and using regex with an **Azure OpenAI model** to validate Spanish language requirements and reduce irrelevant results.
- Led development of a **Next.js and NestJS** AI agent using **Azure OpenAI** to convert natural language prompts into SQL driven email and push notification campaigns, eliminating engineering involvement in growth execution.
- Stepped in for the tech lead and led **4 developers** to deliver Circles in **React Native**, shipping group chat, event creation, user approval workflows, and moderation tools for a community of **7,500+ users**.
- Built a personalized **React Native** feed backed by **NestJS** that surfaces connection activity and recommends relevant posts using profile interest embeddings stored in **PostgreSQL**.
- Built Nudges in **NestJS**, an automated engagement system that sends personalized email and push notifications about unread messages and activity in Circles, increasing user engagement by **25%** and retention by **20%**.

Freelance Software Developer *Jul 2022 – Aug 2023*
Hospital Clinic BR *Tegucigalpa, Honduras*

- Built and deployed a **React and Firebase patient management app** for a private medical practice, supporting registration, visit logging, and clinical documentation; still in production use.
- Owned the full delivery from requirements to deployment: ran 1-on-1 meetings with the doctor to gather requirements, iterated on Figma mockups, and shipped via Netlify with CI/CD.

Software Developer Intern *Jan 2022 – May 2022*
Go Consultores *Tegucigalpa, Honduras*

- Built the **authentication** for the company's mobile apps. A RESTful API in Express.js and TypeScript backed by AWS Amplify and Cognito, handling registration, login, and onboarding across the Flutter apps.
- Built Flutter onboarding, authentication UI, and reusable **Go Lens** components, then developed and demonstrated initial screens for a doctor appointment app.

EDUCATION

Lakehead University *2023 – 2025*
MSc Computer Science (Artificial Intelligence Focus) *Thunder Bay, ON*

Universidad Católica de Honduras *2017 – 2022*
BSc Computer Science *Tegucigalpa, Honduras*

RESEARCH

Predicting Alzheimer's Disease Using ML *Python, PyTorch, TensorFlow*
Master's Research Project, Lakehead University *Sep 2024 – May 2025*

- Compared deep learning and classical ML models on ADNI and OASIS MRI datasets using Python, PyTorch, and TensorFlow, achieving **97% accuracy** and documenting the results in a research paper.
